INLAY

Making advertising invisible, scalable, and profitable

THE PROBLEM

Ads Interrupt

A lot of Gen Z use ad blockers. “Banner Blindness” is at an all-time high. Interruptive ads break the dopamine loop.

Unstable income

India has 2.5 Million active creators, yet 90% earn Zero Revenue from platforms. They rely on manual brand deals, which are unstable.

Logistical Nightmare

Advertisers want to be on Reels/Shorts, but they fear “cringe” content and cannot manage 1,000 separate influencer contracts.

THE SOLUTION

Concept

Inlay is an automated pipeline that inserts brand assets into videos post-production

Key Benefits

- Non-intrusive for the viewer
- Zero-effort for the creator
- Brand-safe for the advertiser

TECH

High Fidelity + Low Compute = Mass Scale

WHY NOW?

Short-form Dominance

Reels & Shorts consume 20% of Indian digital time but capture only 1% of ad spend.

Tech Inflection

Hybrid GenAI pipelines now deliver cinema-quality VFX in seconds, slashing traditional editing costs by 99%

The Privacy Shift

Cookie depreciation is forcing brands back to “Contextual Advertising.”

MARKET

TAM: \$14.9B

- Total Active Creators (Global):~41 Million
- Average Daily Views: 5,000
- Total Annual Inventory: 74.8 Trillion Views/Year
- Monetizable Views (20% Fill Rate): 14.9 Trillion
- Inlay Fee (Global Avg): \$1.00 per 1,000 views
- Global TAM = \$14.9 Billion (Annual Revenue)

SAM: \$870M

- Total Active Creators (India): 2.5 Million
- Average Daily Views: 10,000
- Total Annual Inventory: 9.1 Trillion Views/Year
- Monetizable Views (20% Fill Rate): 1.82 Trillion
- Inlay Fee (India): \$0.48 per 1,000 views (₹40)
- India SAM = \$870 Million (~₹7,280 Crores)

SOM: \$17.5M

- Target Market Share: 2% of Indian Creators (50,000 creators).
- Inventory Capacity: 182.5 Billion Views/Year
- Monetizable Views (20% Fill): 36.5B
- Inlay Fee: ₹40 per 1,000 views
- India SOM = \$17.5 Million (~₹146 Crores)

OPPORTUNITY

Competitors	Legacy Players (Mirriad, Ryff)	GenAI Incumbents (Rembrand)	Inlay
Features			
Primary Target	TV Networks, Streaming (Netflix/Hulu), Movies	Top 1% US Creators (Long-form YouTube)	Short-Form Creators (Reels/Shorts)
Technology	Manual VFX + AI Assist (High Latency)	GenAI “Fusion” (Medium Latency)	Hybrid Pipeline (Optical Flow + GenAI)
Cost Model	High CPM (\$25 – \$50+)	Mid-High CPM (\$15 – \$30)	Mass Market CPM (~\$0.05 Compute Cost)
Integration	Requires “white glove” service	Requires platform login/setup	Automated API / App Integration
Geography	US / UK / EU	US Focused	India First (Global South Expansion)

COMPETITIVE ADVANTAGE

MARKET VALIDATION

Brand Persona

KARTOFFLIN

Home goods. Delivered quick.

D2C Lifestyle, Series A

Current State:

A small team of 5–10 influencers

Goal:

Scale to 50+ monthly partnerships

Pain Points:

- Cannot prove the ROI to executives
- Manager spends 60% of their week in handling logistics

Inlay solves for:

efficiency

trackability

Creator Persona

Tracy Dubma

24, Instagram creator
150K followers

Motivations:

Financial Independence, Creative Focus

Current State:

Sign whatever the brand sends
because they can't afford a lawyer

Pain Points:

- Want to earn but don't want to compromise on content quality
- Infrequent brand deals, delayed pay

Inlay solves for:

consistent income

content quality

60%

of all digital ad
spending was
influenced by
AI technologies
by the end of
2024

73%

of marketers
state that AI is
now critical for
creating
personalized
customer
experiences

**93% of consumers
report skipping or
blocking ads when
possible**

BUSINESS MODEL

Inlay operates as a two-sided network connecting

Brands **with** Short-Form Creators

Demand

Supply

We prioritize Creator Acquisition by offering a market-leading payout rate.

100% brand ad spent

20%
Platform Fee
(Net Revenue)

80%
Creator Payout
Incentivizes viral
supply growth &
adoption

Unit Economics

Gross Margin: 85%+

Tech Cost: <5% of Revenue

GO-TO MARKET

Partner with top 3 Indian Influencer Agencies (e.g., Koflence) to onboard 5,000 creators instantly. Agencies plug Inlay, and increase agency revenue by 15% overnight without extra work.

Every video processed by Inlay in the free tier includes a subtle “Monetized by Inlay” watermark. When a creator’s video goes viral, other creators see the watermark and ask, “How did you get that ad?” Result: Zero-cost organic acquisition.

Open the platform to SME brands (D2C startups) who want to run ads but can’t afford big agencies. Mechanism: Brands upload a logo, set a budget (e.g., ₹5,000), and Inlay auto-places it across 50 micro-influencers.

Phase 1:
Agency Partnerships

Phase 2:
Viral Loop

Phase 3:
Self-serve Platform

Q1 2026

Prove the "Hybrid Engine" works.

- Finalize Optical Flow + GenAI Pipeline (The "Inlay Engine" v1)
- Achieve < \$0.05 compute cost per placement in internal tests
- File provisional patent for "Single-Shot Contextual Insertion."

Q3 2026

Prove Brands will pay.

- Launch Self-Serve Beta for SME Brands (Waitlist opening).
- First 10 Paid Campaigns (Real revenue validation).
- Integrate "Pixel-Perfect" tracking dashboard for advertisers.

Q2 2026

The "Supply Liquidity" (Alpha)

- Launch Closed Alpha with 3 Partner Agencies (e.g., Koflence).
- Onboard 500 Supply-Side Creators (Inventory lock-in).
- Process 50,000 Video Views (Live traffic test).

Q4 2026

The "North Star" Metrics.

- \$10k MRR (Monthly Recurring Revenue).
- Million Processed Views / Month.
- Series A Raise (Target: \$2M round) to scale sales team.

[LINKEDIN](#) [PORTFOLIO](#)

- **Scale:** Built infrastructure serving 15cr+ households for the Govt. of India (Jal Jeevan Mission).
- **Execution:** Solely engineered and scaled a consumer app to 50k+ active users with zero funding.
- **Innovation:** Developed AI systems for organisations such as DRDO, Wabtech and Tata Services.
- **Conviction:** Ranked #1 profitable trading intern at Axxela, but declined PPO to build full time.
